Professional Summary:

I am a self-managed and highly motivated professional with over 7 years of experience in managing Business Intelligence (BI) and Analytics projects across multiple industries. I have fair experience in understanding various businesses and their processes, including project deployment and server administration. I have extensive experience in BI integration with structured databases, and I have effectively managed a team of consultants by establishing priorities and ensuring that they are met in a timely and effective manner. I also have experience in data analysis and deep understanding of data patterns, KPI visualisation and design experience.

Experience:

Business Intelligence Analyst (Supply Chain) – *Applied Materials, Singapore (Feb '20 – till Today)*

- Lead the supply chain and manufacturing domain's research, data, and business analytics functions.
- Operationalized business intelligence solutions and conducted advanced analytics to identify opportunities and strengths to meet business goals.
- Presented and communicated the findings in an understandable and actionable way tailored to the audience and business user's needs.
- Established long-term and value-added relationships with assigned business partners to educate and develop the analytic capability of business customers and the organization.
- Created and maintained data visualizations that educated, informed and engaged business partners on key metrics and performance measures.
- I collaborated with the enterprise data warehouse, data governance, and business teams on data quality issues, as well as the architecture and structure of data repositories.

Lead BI Consultant – *Icon Business Solution, India (Sep '14–Aug '16) & Singapore (Sep '16–Feb '20)*

- Worked with cross-functional clients to structure problems, identify appropriate data sources, extract data, and develop integrated information delivery solutions.
- Played key roles in medium to large BI projects (e.g., Consultant, Analyst & Lead).
- I participated and provided technical leadership in all phases of BI projects, from discovery and planning through implementation and delivery.
- Graphical User Interface development for senior, middle & lower management.
- Performed cleansing, de-duplication, and harmonization of data across various systems.
- Supported the planning and coordination of data governance activities.
- Developed and maintained an enterprise data architecture roadmap to improve the maturity and effectiveness of enterprise data management.

BI Developer (Intern) – *NineA Business Connect, India (Feb '14–Sep '14)*

- Work closely with our BI team to develop our data infrastructure to provide access to information and expand reporting capabilities.
- Work with Business Intelligence tools such as QlikView to develop reports and provide data to stakeholders.
- Implemented data quality checks & data model optimization activities.
- Create and leverage analytical approaches to perform analysis of domain specific source data to provide accurate statements and conclusions.

Education:

Master of Computer Application – *K.J Somaiya, India (Jul '11-Jun '14)*

Bachelor of Computer Application – *Pune University, India (Jul '11-Jun '14)*
